

Did you miss our HPV Vaccination Tips webinar?

September 27, 2019

This article is intended for pediatricians, family practitioners, dentists, and their office staff

On September 12, we hosted a live webinar about the HPV vaccine and offered tips to help improve vaccination rates. During the webinar we discussed:

- How the HPV vaccine can prevent HPV cancers from developing
- The importance of your recommendation to parents
- How dentists can help support HPV vaccination adoption
- Tips for how to talk to your patients about the vaccine

Thank you to everyone that was able to attend and join our discussion. If you were unable to attend, please see our [recorded webinar](#).

We are sending a brief feedback survey to all who registered. Please take the time to answer these questions which will help us improve future sessions.
