

MASSACHUSETTS

Blue Cross Blue Shield of Massachusetts Formulary: 6-Tier Plan Specialty Pharmacy Medications

Last Updated: March 31, 2020

The following list includes specialty medications that are covered by plans with the Blue Cross Blue Shield of Massachusetts formulary. These medications are usually used to treat complex health conditions.

This isn't a complete list of covered medications, and inclusion on the list doesn't guarantee coverage.¹ You must have a valid prescription from a licensed health provider to receive coverage for these medications. Some medications may also be subject to pharmacy management programs, such as Step Therapy, Prior Authorization, or Quality Care Dosing, or have other coverage requirements.

Specialty Pharmacy Medications Included in the National Preferred Formulary (NPF)

The specialty medications listed in this document are also included in the National Preferred Formulary (NPF), which is available through Express Scripts®, an independent company that administers your pharmacy benefits on behalf of Blue Cross Blue Shield of Massachusetts. Pharmacy management program requirements apply to specialty medications included in the NPF.

Where to Fill Specialty Pharmacy Medications

Plans with the Blue Cross Blue Shield of Massachusetts formulary or NPF require members to fill medications on this list at one of the available in-network specialty pharmacies on the following pages. However, if a highly specialized medication isn't available at one of our specialty pharmacies, we'll cover the cost of the medication when it's filled at another in-network pharmacy.

NOTE: Some specialty medications on this list may be considered non-covered, including new medications under review. Your doctor may request an exception for a non-covered medication when medically necessary.²

Learn More About Your Coverage

For more information about your pharmacy benefits, including the NPF and the medications listed in this document, log in to your MyBlue account at bluecrossma.com/myblue.

1. Not all medications listed are covered by all prescription plans. Check your benefit materials for details.

2. If approved, you'd pay the highest tier cost.

You Have a 6-Tier Medication Plan

We sort generic, brand-name, and specialty medications into tiers based on safety, clinical effectiveness, clinical outcomes, cost, and innovation. Your prescription plan is based on a 6-tier plan design. What you pay for medications at the pharmacy is determined by your prescription plan and which tier a medication is in. The following indicates how we sort medications by tier:

- Tier 1 – Preferred generics
- Tier 2 – Non-preferred generics
- Tier 3 – Preferred brands
- Tier 4 – Non-preferred brands
- Tier 5 – Preferred brand specialty
- Tier 6 – Non-preferred brand specialty
