JOSIE KING FOUNDATION at BCF
creating a culture of patient safety, together

On February 22, 2001, eighteen-month old Josie King died from medical errors.

98,000 people die every year from medical errors, making it the fourth leading cause of death in the United States.

The Josie King Foundation's mission is to prevent others from dying or being harmed by medical errors. By uniting healthcare providers and consumers, and funding innovative safety programs, we hope to create a culture of patient safety, together.
